PROJECTS

Hostel Finder — Search Hostels Nearby

It is a GUI application where hostel owners can add their hostel by creating a Hostel Owner account and the Hostel Seekers can search for hostels according to category (Boys/Girls) and location. This application also provides the facility to the hostel owners to update/edit their hostel information as well as delete their hostel and owner accounts.

My Hostel — Students Database Management System

It is a C language-based application that allows hostel owners to create, view, edit, and delete records of their students. It aims to replace the traditional practice of keeping records in hand-written documents.

SKILLS
